

SI Guide:

Supplementary Figure1.

This file contains the raw data (un-cropped blots and gels) from Figures 2b, 2e, 3f, and Extended Data Figures 2b, 3f, 4a, 4b, 4e, 5b, 6b, 8c, 8f, and 9h.

Supplementary Table1.

This table contains the measurements for tumor volume in the in naïve and resistant KB2P tumors. KB1P13 is the original tumor (PATHO 09 SRO 012), which was either vehicle treated (PATHO 09 SRO 238) or PARPi treated to induce resistance (PATHO 09 SRO 097). PROMASS indicates the barcode number of the mice. MDZ (MDZ 1383, MDZ 2630 and MDZ 2809) numbers are cryobank IDs corresponding to the original, naïve and resistant tumors respectively.
